

Central Arizona Dental Foundation

Interpreter Protocol

Our goal of this clinic is to relieve pain and address the most urgent dental need(s).

1. Any information you see on the patient registration form or information the patient tells you about their care needs to be kept private. Please do not discuss it with anyone.
2. Interpreters are needed throughout the clinic. Your Lead will go over the clinic layout with you and explain the patient flow. You will be given direction about where to stand or sit, etc.
3. If/when you are needed to help a patient, a yellow card will be held up. Please go to the person holding the card and assist the patient.
4. In most cases, you will not stay with one patient throughout the clinic. You will help that person and then be dismissed to help another patient.
5. Interpreters will serve in various areas of the clinic – sometimes remaining at a particular post and sometimes moving around to see where you are needed.
6. Please do not promise patients any particular treatment. Ask someone in an orange shirt if you are unsure what to tell a patient.
